

Career Objective

Motivated Computer Science and Engineering Graduate with expertise in Python, Data Science and Machine Learning. Seeking an entry-level role to apply analytical and problem-solving skills in data-driven projects. Passionate about innovation, eager to contribute to a dynamic team.

Professional Skill

- Programming Languages : Python, C, SQL, HTML & CSS
- Tools/Libraries : NumPy, Pandas, Scikit-learn, Matplotlib, OpenCV
- Database & Backend : MySQL, SQLite, Flask
- Machine Learning

Soft Skill

- Communication
- Leadership
- Teamwork and Collaboration
- Time Management and Organization

Education

B.E. Computer Science and Engineering P.A. College of Engineering and Technology, Coimbatore CGPA: 8.3	2026
Higher Secondary(HSC) (SSLC) Lourde Matha Convent Matric Hr. Sec. School, Udumalpet (HSC-72%) (SSLC-81%)	2022

Projects

Face Attendance Management System

- Developed an automated attendance system using face recognition technology.
- Implemented OpenCV and deep learning techniques to improve accuracy.

Employee Attrition Prediction

- Machine learning model (Random Forest) using Scikit-learn to predict employee attrition with data preprocessing, feature scaling, and performance evaluation
- Integrated a user-friendly interface for real-time predictions, probability visualizations

Fake Bot detection on X(Twitter) with explainable AI

- Developed an AI-based bot detection system for X using supervised ML models (XGBoost, Random Forest, ANN) to classify fake vs. genuine profiles with high accuracy,
- Implemented end-to-end data preprocessing, feature engineering, and model evaluation to identify malicious or automated accounts, improving detection accuracy inspired by research techniques used for identifying fake profiles in social networks.

Certifications

- Machine and Deep Learning using Python
- Fundamentals of Data Science With Python
- Professional Diploma in Computer Application at(Computer Software Education-Pvt)
- Basic of Java

Languages

- Tamil
- English
